

## **Appendix A**

This appendix contains the following sections:

- Supported Printer Specification Index

- Supported Printer Specification Summary

- Supported Terminal Specification Index

- Supported Printer Specification SPS01

- Supported Terminal Specification STS01

## Supported Printer Index

The following table details:

- 1 The printer models supported by the APP.
- 2 The font options available for them.
- 3 The Uniplex driver names to use for portrait and landscape orientation.
- 4 The Supported Printer Specification file name that contains the detailed description of supported functions for the printers.

Printer Model	Font Option	Driver Name(s)	SPS No
HP11	No Font cartridge	hp11ecma L/hp11ecma	sps01 sps02

			sps91

- <sup>1</sup> This model has not been tested by Uniplex. It is assumed that the HPIII has the same paper characteristics as the HPII.
- <sup>2</sup> The standard Laser Jet Series II cannot rotate fonts. As a result the choice of fonts is normally much reduced from the choice available in Portrait mode. None of the HP Font cartridges in this release have any proportional landscape Fonts.
- <sup>3</sup> These cartridges use a symbol set not available in the standard printer. As a result there is no landscape entry possible as cartridge fonts are portrait only. The standard Series II landscape entry should be used instead.
- <sup>4</sup> These symbol sets are 7 bit only symbol sets. No attempt is made to compose any 8 bit character where there is no equivalent in the symbol set.
- <sup>5</sup> This printer has not been tested by Uniplex as no model was available. However, the printer engine is the same as the normal LBP4 so the paper characteristics should be the same. The font capabilities are the same as the LBP-8III+, which has been tested.

## Printer Capability Summary

The following table summarises the main features of the printers supported by the APP. Full details of the support, and any printer entry specific comments or requirements, are available in the appropriate printer's Supported Printer Specification (**SPS**) file.

In the following tables, **Yes** is used when a printer's optional feature (such as multiple bins) is configured into the driver but has not been fully tested by Uniplex (probably because the test printer did not have the option installed). **YES** is used to indicate that the particular option has been tested. The columns are:

Page Orientation	Indicates the mode of printing: <b>Portrait</b> (as on this page) or <b>Landscape</b> (sideways across the page).
Multi-bins	Indicates whether definitions for switching between multiple paper trays exist.
High-res	Indicates whether printing of high quality graphics, pie charts, etc. is possible when Uniplex AGS installed. On some printers this is not possible in Landscape.
Line Draw	Indicates how Uniplex prints boxes and lines. Can be either as solid <b>Lines</b> or <b>Characters</b> (using the characters +, - and !).
Duplex	Indicates whether definitions for switching Duplex printing on and off exist (both sides of the paper).
No. of Fonts	Shows how many of each type of font are configured in Uniplex. The three columns break the fonts into <b>Fixed</b> pitch, fixed pointsize <b>Proportional</b> and <b>Scalable</b> pointsize proportional.

Printer Capability Table, Part I
